CONSCIOUS

BETWEEN POWER AND VULNERABILITY

LEADERSHIP

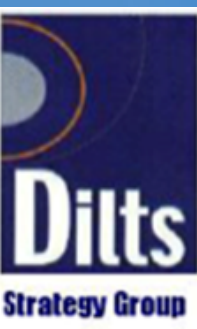

**ROBERT
DILTS**

**LEADERSHIP IN TIMES
& OF CRISIS**

CONSCIOUS LEADERSHIP & LEADERSHIP IN TIMES OF CRISIS

THE NEW CORONAVIRUS CRISIS further strengthens what we consider to be the most advanced approach to leadership: that of "conscious" leadership.

It challenges even the model of society that we have considered as "normal". The shock wave is already leading organizations to rethink their purpose and to develop a model of leadership that integrates even more stakeholders into the societal mission of companies, and the necessary mindset to make it happen.

During this international certification training, Robert Dilts will share with you this model of Conscious Leadership resulting from the modeling of leaders that he has studied and updated in recent months.

What is the difference that makes the difference among these leaders of the new generation and that the COVID-19 crisis has now made necessary?

ROBERT DILTS is a researcher, author, and trainer in the field of leadership. His ability to create models that "make a difference" is recognized worldwide. He is the author of "Strategies of Geniuses", "Visionary Leadership" and of the 3 volumes SFM1, SFM2, SFM3 which respectively address the success strategies of new generation entrepreneurs, collective intelligence and conscious leadership. Today, he is the inspiration for many generative coaching and consulting tools applied internationally.

CONSCIOUS LEADERSHIP & LEADERSHIP IN TIMES OF CRISIS

Elisabeth FALCONE and Jean François THIRIET are grateful to Robert DILTS for agreeing to come and present his work around CONSCIOUS LEADERSHIP.

Elisabeth & Jean François are both part of Robert Dilts' International SFM Leadership Team. After these 3 days of training with him, they will offer the opportunity to follow the SFM conscious leadership certification over 6 additional days (dates at the end of the presentation).
